

# Instructor/team check-in

March 29, 2021

Geonosians

*Bulbul, Li, Xia*

# Status

We are in the **Yellow** Zone right now. The reason for that would be that we need some more time to make some some of the functions work. Some functionality is limited for the template we are using.

# Project activities during the past week

All of us worked on the header and the footer together.

Xia:

- Created a server on google cloud for easy collaboration on Wordpress  
**LAMP** (Linux, Apache, MySQL, PHP)
- Plugs-in  
Elementor, Essential add-ons for elementor, Wpforms, Max upload filesize, WPvivid Backup Plugin
- Created the Membership & About Us pages.

Bulbul:

- Created Home and the Get Involved page.

Li:

- Created Career and Events page.

# Demo - Wordpress

[Website Link](#)

# Project activities during the upcoming week

Each member keeps working on their own pages. We will have more meetings to work together so we can improve the pages we have made.

Bulbul:

- Project final reports
- Lessons learned document
- Summarized customer notes

Li :

- Final project presentation
- Documentation on Github and URcourse
- Summarized customer notes

Xia:

- Document on Wordpress
- Wordpress backup on Github
- Login/out function

# Reflection

- **Does the team feel they are on track?**

We are on the track. We are using our design idea confirmed with IABC staff. Also we are trying to improve our design according to the suggestions from them.

- **What progress does the team particularly feel good about it?**

We feel good about the main design tools we use. Including plugins and the template.

- **What barriers does the team feel is a current impediment to success?**

The limited functions we can use in the free template. Because some features are only provided with payment.

- **What help does the team require to move positively forwarded?**

Pro account would be much improvement for we apply our design idea to the website.

- **What questions or concerns does the team have?**

Q1: Do we have to create a full content and functional website?

Q2: Is that ok if we use a different PHP or server?
